

Webpage Designing

COURSE OVERVIEW

This course is a beginner's hands-on guide intended to provide you with the skills to create personal and business web sites.

You will learn how to create web pages consisting of text, graphics, links and uploading to a server. You will also learn the concepts of design, tools and web sites management.

Upon successful completion of this course, participants will be able to:

- Apply web site design considerations when creating a web site with a wizard. They will also be able to add and modify structural elements in an existing web
- Apply web page design concepts to create and modify web pages by using frames
- Build a web-based form to collect and store user data.
- Modify pictures as well as add sound and web components (such as rotating banner ads, marquee text and ActiveX controls) to their web pages.
- Use reports and tasks to manage and collaborate on web site creation.
- Animate text and format text and web pages with Dynamic HTML and style sheets.
